

MISSION: To set a higher standard for commercial entrance matting, and provide superior features and benefits for genuinely better value.

PHILOSOPHY: We believe developing long-term relationships with clients will come from our commitment to providing excellent products at a fair and reasonable price, and to give genuine customer service.

WHAT SETS ALUMAT APART?

- Our mats are a cost-saving investment, rather than a throw away consumable. (see *product specifications*) which means our mats will last and can be refitted with new infills, rather than go to a land fill.
- We will provide excellent service, even make mats within 24 hours if requested.
- We measure, make and install.
- We will work hard to find a solution to your needs and have a range of unique products that can do just that, any depth, any width (we have made mats up to 12 meters wide in one piece), any shape or situation, either inside or exposed to the weather outside, we have the ideal solution for you.
- There are many other features/benefits which are unique to ALUMAT (see our web page or brochures on-line).

WHO HAVE WE DONE WORK FOR?

See www.alumat.co.nz/work. Projects include: ASB Properties, Crown Plaza Hotel, Metlifecare, Ignite Architects, VW New Zealand, Schools, ASB Show grounds, convention and meeting halls etc.

CONTACTS

David Probett (Director)
Ph: 027 220 9901

ALUMAT is part of Probett Developments Ltd, a family business, established in 1984 as a commercial building contracting firm. This experience has been invaluable in developing solutions to commercial matting needs that were not available in New Zealand. David will be pleased to assist you with any information you may require.

Neil Paraha (Sales)
Ph: 027 286 0628

Neil heads our sales department and also has a strong background in manufacturing. Neil will be pleased to assist you with any inquiries you may have.
